Pro Shield

Fluor Protector

To keep teeth healthy, small amounts of fluoride are needed during all stages of tooth growth. Several dental organizations and research reports recommend the professional use of fluoride varnish. Pro Shield is used for the prevention of recurrent cavities, cavity development, decalcification around orthodontic appliances, as well as pit and fissure (occlusal) cavities.

Based on our patented technology, we come up with a unique packaging. The design of separating the medicament and the brush head maximizes the doctor's operational convenience.

Summary of advantages

· Stable and long-lasting fluorine release — **22,600 ppm fluoride**

· Excellent consistency and long-term performance stability

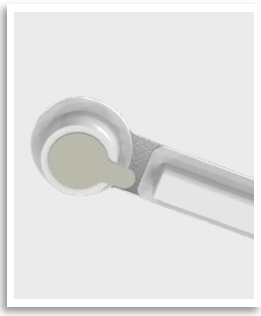

· Fine and uniform particles enable a stable suspension of sodium fluoride, enhances fluorine release, as well as distribution

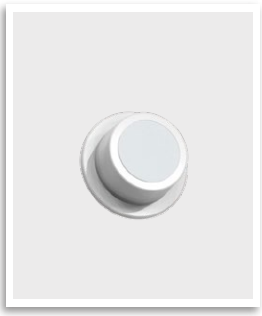

· Pleasant fruit flavor to improve patients experience

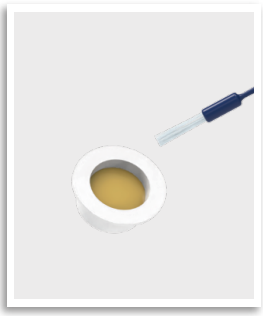

· Unique packaging design facilitates clinical operation

· Light yellow provides visual control

Material color: Light Yellow

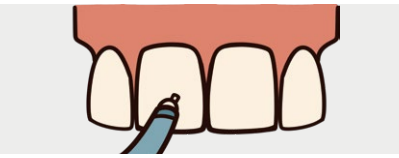

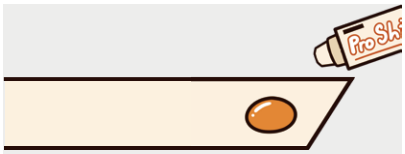

Excellent Operation Experience with Pro Shield

1. Make sure the areas to be treated are clean

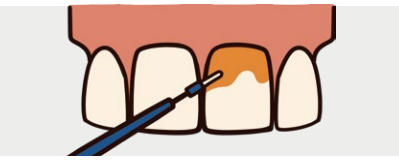

2. Remove excess saliva with triple syringe or cotton pellets

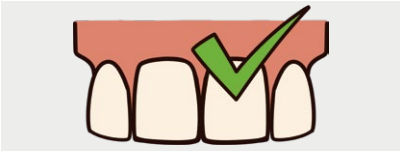

3. For 10g tube:

4. For 0.4g unit-dose:

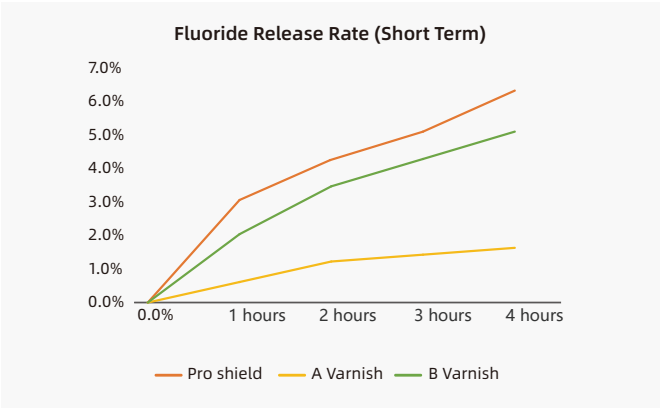

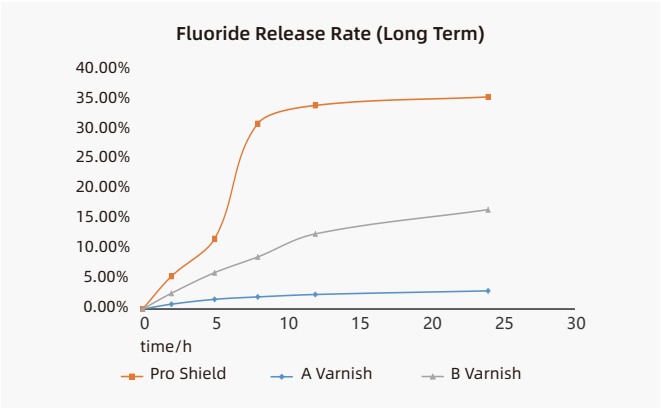

5. Use the microbrush to apply a thin layer to the tooth surface

6. Forms a thin film on the tooth surface

High Fluoride Release Capability Suitable for Kids and Adults

*Data from HUGE Lab

Clinical application suggestions:

1. Recommended dosage:

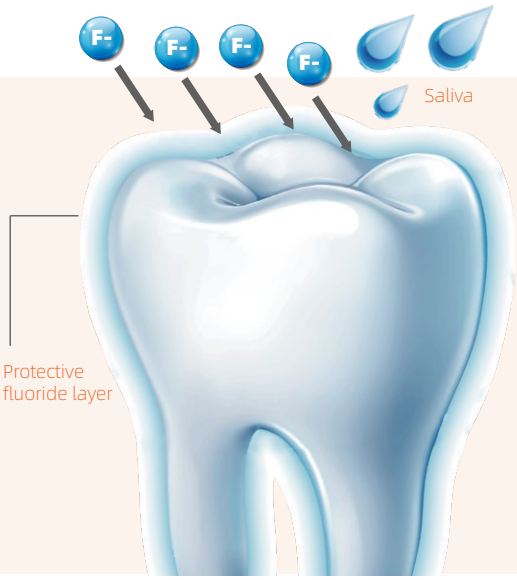

Deciduous dentition ≤0.25g (5.65mg fluoride)
Mixed dentition ≤0.4g (9.04mg fluoride)
Permanent dentition ≤0.75g (16.95mg fluoride)

2. Frequency of use:

Use once every **3-6 months.**

3. Precautions after use:

After using this product, do not brush the teeth, chew food, or drink hot drinks and alcoholic products (beverages, mouthwash, etc.) within **4 hours.**
